

BRAVE BLUE WORLD

FREE SPECIAL SCREENING

FOLLOWED BY A VIRTUAL PANEL DISCUSSION WITH WATER PROFESSIONALS

LEARN HOW HUMANITY IS ADAPTING TO HOW WE MANAGE WATER AS A PLANET

Featuring Matt Damon, this documentary is the first honest and hopeful documentary that paints an optimistic picture of how humanity is adapting new technologies and innovations to re-think how we manage water as a planet. The event is hosted by the Water Environment Federation (WEF), Nebraska Water Environment Association (NWEA), and the Nebraska Section of the American Water Works Association (NSAWWA). WEF is a proud sponsor of the documentary production. Students and professionals are invited to attend.

The event will open with a viewing of the 50 minute documentary followed by 45 minutes of discussion with a panel of local and national water professionals to present and answer questions about ways in which we are facing these challenges and taking steps towards the future nationally, and locally in Nebraska. Panel members include:

Dr. Eileen O'Neill | Former Executive Director of WEF, 2020 WEF Fellow
Donna Garden | City of Lincoln Transportation and Utilities, Assistant Director of Utilities
Dr. Nick Brozovic | Water for Food Daugherty Global Institute at the University of Nebraska, Director of Policy
Ron Sova | HDR, Nebraska & Iowa Water Business Group Manager

Students who attend the event and join the student chapter of the Nebraska Water Environment Association (NWEA) within 30 days of the screening will be given free membership to the organization. When you attend a student chapter meeting, you'll also receive a free t-shirt from NWEA!

MONDAY, SEPTEMBER 28TH
6:00 – 8:00 PM

To receive a link to the virtual screening, please RSVP at nebwea.org
