

River Hydraulics and Sediment Transport

Junke Guo
Department of Civil Engineering
University of Nebraska
Omaha, NE 68182

Contents

I	River Hydraulics	4
1	Boundary shear stress	5
1.1	Average shear stress from momentum equation	5
1.1.1	Shear stress in unsteady flow	5
1.1.2	Shear stress in gradually varied flow	8
1.1.3	Shear stress in uniform flow	8
1.2	Average shear stress from friction laws	8
1.3	Experimental flume: Bed shear stress and side-wall shear stress	9
1.3.1	Side wall correction in flume experiments	11
1.3.2	Bank shear stress in narrow streams	13
1.4	Skin shear stress and from drag	13
1.5	Measurement of shear stress in hydraulic labs and fields	13
1.6	References	13
2	Turbulent velocity profiles	14
2.1	Simplified momentum equation	14
2.2	Mixing length hypothesis	14
2.3	Logarithmic velocity profile	14
2.4	Near wall turbulent velocity profile	14
2.5	Modified log-wake law	14
2.6	Velocity profiles over bed-forms	14
2.7	Discharge from velocity profiles	14
2.8	Measurement of velocity profiles in hydraulic labs and fields	14
2.9	Estimation of shear stress from velocity profiles	14
2.10	References	14
II	Sediment Transport	15
3	Sediment properties and settling velocity	16
3.1	Physical properties of sediment	16
3.2	Sediment mixtures	16
3.3	Settling velocity	16
3.4	References	16

4	Bedload	17
4.1	Bedload initiation	17
4.2	Bedload velocity	17
4.3	Bedload transport rate	17
4.4	Introduction to empirical equations	17
4.5	Measurement of bedload in hydraulic labs	17
4.6	Estimation of bedload from field data of suspended load	17
4.7	References	17
5	Suspended load	18
5.1	Concentration profile (Rouse equation)	18
5.2	Suspended load transport rate	18
5.3	Suspended load transport rate from modified log-wake law	18
5.4	Introduction to empirical equations	18
5.5	Measurement of suspended load in hydraulic labs and fields	18
5.6	Comparison of Missouri River data with theoretical equations	18
5.7	References	18
6	Total load	19
6.1	Sediment transport capacity	19
6.2	Supply-limited sediment transport	19
6.3	Sediment-rating curve	19
6.4	Short- and long-term sediment load	19
6.5	References	19
7	Reservoir sedimentation	20
7.1	Incoming sediment load	20
7.2	Reservoir hydraulics	20
7.3	Trap efficiency and aggradation	20
7.4	Dry specific weight of sediment deposition	20
7.5	Life expectancy of reservoirs	20
7.6	Density structures	20
7.7	Reservoir sedimentation surveys	20
7.8	Control measures	20
7.9	References	20
III	Scour around Hydraulic Structures	21
8	Bridge scour	22
8.1	Concepts of bridge scour	22
8.2	Pier scour	22
8.3	Pressure flow scour	22
8.4	References	22
8.5	Appendix	22
