

ENVIRONMENTAL IMPACT ASSESSMENT

CRPL 471/871 Online Class Summer, 2019 (8-Week session)

- Understand National Environmental Policy Act (NEPA) contents processes methods, procedures and applications
- Learn the critical themes in environmental impact assessment
- Evaluate environmental impacts for projects, plans and programs
- Improve environmental analytical skills
- Learn from problem-based, real cases
- Conduct interdisciplinary environmental analysis
- Open a big job market for students to work for environmental impact assessment

The field of environmental assessment is continually growing. Right now a number of consulting firms and public agencies are looking for people who understand the National Environmental Policy Act (NEPA) Compliance, including environmental impact statements, environmental assessments, and categorical exclusions. The knowledge of the processes and procedures of what NEPA documents are and what they consist of will most likely get someone a job whether it is an intern or a full-time position. This Environmental Impact Assessment class (CRPL 471/871) would be a good class to take if a student is looking to do any kind of environmental assessment/planning work.
