

Senior Bridge Engineer

InfraStructure, LLC has a unique opportunity for a Senior Bridge Engineer to develop and manage our Bridge Group. With the support of other firm principals, this candidate will have the latitude to grow this business segment and associated personnel. This management position could transition into an ownership opportunity in the firm for the right candidate.

Company Description

Located in Omaha for over 22 years, our structural engineering consulting firm provides services including structural design of buildings, bridges, and special structures; as well as a variety of construction engineering, precast concrete engineering and detailing, and Building/Bridge Information Modeling (BIM/BrIM) services. InfraStructure offers a flexible and positive work environment that values employee contributions, allows for a good work/life balance and provides a comprehensive benefit package and competitive salary which is reflected in our employee retention.

Required Qualifications

- Bridge engineering and project management experience on DOT, county, and/or city projects
- Licensed Professional Engineer (PE or SE)
- Ability and desire to market clients and manage personnel
- Experience with bridge design and drafting software
- Excellent written and verbal communication skills

Other Desired/Preferred Qualifications

- Bridge inspection and load rating experience
- Construction engineering (temporary works design) experience
- Familiarity with Nebraska Department of Transportation bridge design policies and procedures and drafting standards of practice
