Maybe you’re an aspiring designer looking to hone your skills with CADD and other integrated design software. Or, do you want to get your hands dirty providing construction observation and survey assistance on an active project site? No matter your professional interests, Alfred Benesch & Company offers a variety of internship opportunities that will help you grow and explore the A/E/C industry.

**Interner with Benesch is your chance to receive meaningful training from experienced professionals.** At Benesch, you will:

- Get first-hand experience working with public and private clients
- Complete hands-on design or field construction assignments
- Conduct client and project research

**QUALIFIED APPLICANTS MUST BE:**

- Current undergraduates working toward an Associate or Bachelor of Science in an applicable engineering or engineering technology field
- Flexible with schedule to allow for weekend or out-of-town work when necessary
- Willing to work outside in fair and inclement weather
- Familiar with CAD integrated software
- Excellent verbal/written communicators with strong analytical and problem-solving skills
- Excellent workers
- Able to prioritize assignments and stay organized

Many of our past interns apply for full-time positions at Benesch after they graduate. And many of those new-hires end up staying for years to come.

**WHERE COULD A BENESCH INTERNSHIP LEAD YOU?**

The hands-on experience during my internship was extremely valuable to my progression from a student to an employee.
