

Greetings from the College of Engineering!

Engineers Week (E-Week) has been a Nebraska tradition since 1913. In conjunction with National Engineers Week, UNL students in Lincoln and Omaha come together with the surrounding community during this week to plan and coordinate events that:

- Celebrate how engineers innovate and improve our world
- Increase public dialogue about the need for engineers
- Bring engineering to life for students, educators, and families

We are actively seeking individual and corporate partners to help sponsor E-Week 2023 activities in Lincoln and Omaha, which will be held on **February 19-25, 2023**. The programming designed during E-Week impacts students at all levels in their educational path and is an excellent opportunity to put your company name in front of many future and current engineering students and community members who are actively looking to make the world a better place.

This year, our theme is “Blast Off!” with a focus on the celebration of engineering innovation in outer space and the different approaches to problem solving that each engineering discipline would bring to a new environment outside of Earth. While events change on an annual basis based on the E-Week theme, these events generally include design competitions, community outreach/awareness programs, keynote speakers, networking mixers, student banquets, and light-hearted social events that bring the collegiate engineering community together.

While donations at any level are encouraged and much appreciated, we are offering Bronze, Silver, Gold and Diamond level sponsorships that you might find beneficial. You can read about these sponsorship levels and benefits in the enclosed documents or on the E-Week website at <http://engineering.unl.edu/e-week>.

All sponsors need to submit their donation by **Friday, January 13, 2023**, to receive the benefits listed with each sponsorship level. We will accept in-kind donations through E-Week itself, February 19.

As always, we thank you for your consideration and ongoing support of the College of Engineering and E-Week! Please contact us if you have any questions.

Sincerely,

Phillip Carter
