The Program Basics

You can do more than get coffee and run errands. Stretch your potential with a program built around a hands-on experience and real-life projects. You are discovering what you want to do; we want to help.

Real-World Experience
We believe that learning by doing, making mistakes, and serving as a contributing team member is the best way to gain experience.

Many-to-One Mentorship
Throughout your internship you will work with mentors from various fields that will help you discover your interests and guide you through challenges.

Intern Team Projects
In addition to assisting on client projects, you may work on a team of interns to develop a plan set for a real-life project.

Relaxed Environment
Amp up your skills in a comfortable, friendly environment that lets you focus on success—not on whether or not your tie matches your shirt.

Volunteer Opportunities
Our interns are encouraged to participate in JEO Foundation events, which are aimed at giving back to the communities we work in.

JEO’s Network
Being part of JEO’s community of interns means you have access to resources and education you won’t find anywhere else.

About Us
At JEO, you will spend your internship surrounded by passionate students like yourself. You will collect incredible experiences, build lasting friendships, and learn from industry leaders.

- Eight locations in Nebraska, two in Iowa, and one in Kansas.
- Over 82 years of experience.
- Architecture, Engineering, Surveying, Planning, Community Engagement, Environmental Sciences, and Funding.

We understand that school is your first priority so we offer a flexible work schedule, provide you with relevant hands-on experience and help guide your future in any field you choose. Interns make up 10% of JEO’s staff. Many are offered full-time positions at the completion of the internship.

If you would like to be considered for a JEO internship please apply at jeo.com/careers/internships.

“When I think of JEO as a workspace I think of home. JEO has an inviting atmosphere with many happy faces that are willing to help in any way possible. I first experienced this side of JEO as an intern. The intern experience is extraordinary, as JEO gets you involved entirely into projects that will be applied in the real world.”

Justin Insinger
Project Engineer

“Placek Park Drainage Improvements
This project addressed a specific storm drainage issue affecting a local trail in Wahoo, NE. We kicked off the project by meeting with the City of Wahoo staff on site to see what issues needed to be addressed.

Armed with knowledge from the project owner, we performed a topographic survey to serve as the basis for our design. Our intern team came up with multiple options to solve the problem at hand.

Working as a team, we narrowed down the design to the option that would accommodate the city’s need for a good solution, without breaking the budget. This was a great learning experience as we could take the project from beginning to end.

The communication with the city and the teamwork within the office set me up for success as I began my career as a full-time employee at JEO after my internship.”

Karl Dietrich
Planner

“As a planning student, this interdisciplinary intern project helped me better understand traffic projects and the real-world problems that need to be solved when creating solutions that benefit whole communities.”
At JEO, you will spend your internship surrounded by passionate students like yourself. You will collect incredible experiences, build lasting friendships, and learn from industry leaders.

COMPANY SNAPSHOT
• Eight locations in Nebraska, two in Iowa, and one in Kansas
• Over 82 years of experience
• Architecture, Engineering, Surveying, Planning, Funding, Community Engagement, and Environmental Sciences

The Basics
You are discovering what you want to do; we want to help. Here are the basics of our internship program.

Real-World Experience
We believe that learning by doing—even if you make mistakes—is the best way to get experience serving as a contributing member of a team.

Life at JEO

Tatiana Pope
Water Infrastructure Intern

“There is no better scenario to learn something new and valuable than life circumstances! The Intern Project at JEO has given me precisely that: The opportunity to experience tangible project challenges and the responsibility to think of alternative solutions.”

Jack Schulz
Electrical Intern

“If I had to say something about my experience at JEO, I would say that JEO has offered me an amazing chance to learn skills and experience work that just cannot be found in a classroom. I have also made important connections with my coworkers that will be valuable for years to come.”

Intern Project Highlight
Our interns do real-life work. Here are some of the projects they have completed during their internship.

Ankeny, IA

NW Irvinedale Drive Water Main Improvements

The Challenge:
Ankeny, Iowa, is a rapidly growing suburb of Des Moines. The outskirts of Ankeny are in continual development and the city recently began work on a new Casey’s General Store. City officials needed a water main design for the new general store that conforms with its existing construction to allow for its opening in August of 2019.

The Solution:
Our water infrastructure intern team, spread out among three different cities, coordinated remotely to design a layout for a water main accessible to the new store. The design routed 850 feet of 12” diameter pipe near the new store. The pipe tied into an existing water main south of the store, ran through a casing pipe laid out in the store design, avoided existing storm sewers and utilities, and ended north of the new store.

Project Benefits:
The general store is a valuable convenience for the surrounding community that couldn’t open without a water connection. Our design allows for the timely opening of the new store while minimizing negative impacts on the new construction and surrounding community. Further development near the store will be able to tie into the water main, providing water to the city as it continues to grow.
