

Mehrdad Negahban, Ph.D.

December 6, 2019

Professor

Department of Mechanical and Materials Engineering

U.S. Director

Advanced Mechanics and Materials Engineering International Laboratory (**AMME-International**)

W311 Nebraska Hall

University of Nebraska-Lincoln

Lincoln, Nebraska, 68588-0526

Phone: 402-472-2397

FAX: 402-472-8292

e-mail: mnegahban@unl.edu

Negahban Group: <http://mmenegahserver.unl.edu>

AREAS OF RESEARCH SPECIALIZATION

Nonlinear Mechanics of Materials and Material Simulation: General interest in theoretical and computational analysis and simulations, and in the experimental characterization of the thermodynamics of solids, with specific interests in constitutive modeling, nonlinear and time dependent characteristics, finite deformations, phase transformations, and in development of object oriented finite element methods. Most of this work is focused on modeling and characterization of the response of glassy and semi-crystalline polymers, with a developing interest in modeling and characterization of failure and fracture with aging, and with developing work on biological materials.

EDUCATION

Ph. D. (1988): University of Michigan, Applied Mechanics

Dissertation: “Material Symmetry and the Evolution of Anisotropies in First Gradient Theories of Nonlinear Material Behavior; Inelasticity; Polymer Crystallization.” (Advisor: Alan S. Wineman)

M. S. E. (1984): University of Michigan, Applied Mechanics

B. S. (1982): Iowa State University of Science and Technology, Mechanical Engineering

PROFESSIONAL EMPLOYMENT

1983: Teaching Assistant in the Department of Aerospace Engineering at the University of Michigan.

1983-88: Teaching Assistant and Instructor in the Department of Mechanical Engineering at the University of Michigan.

1988: Visiting Research Associate at Michigan State University, Machinery Elastodynamics and Intelligent Materials and Structures Laboratory.

1989-95: Assistant Professor of Engineering Mechanics, University of Nebraska-Lincoln, Lincoln, NE.

1995-2010: Associate Professor of Engineering Mechanics, University of Nebraska-Lincoln, Lincoln, NE.

2010-: Professor of Engineering Mechanics, University of Nebraska-Lincoln, Lincoln, NE.

OTHER INVITED PRESENTATIONS

1. “Mechanical Modeling of Isothermal Solid Polymer Crystallization,” M. Negahban, Department of Mechanical Engineering, Cornell University, Ithaca, New York, May 1988.
2. “Mechanical Modeling of Isothermal Solid Polymer Crystallization,” M. Negahban, Department of Engineering Mechanics, University of Kentucky, Lexington, Kentucky, July 1988.
3. “Mechanical Modeling of Isothermal Solid Polymer Crystallization,” M. Negahban, Department of Engineering Mechanics, University of Nebraska, Lincoln, Nebraska, November 1988.
4. “Mechanical Modeling of Isothermal Solid Polymer Crystallization,” M. Negahban, Department of Mechanical Engineering, Florida State University, Tallahassee, Florida, March 1989.
5. “Mechanics of Polymers in the Glassy-Rubbery Range: Crystallization and Shape Recovery,” M. Negahban, Dow Chemical Company, Freeport, Texas, September 1994.
6. “A Thermodynamic Theory for Characterizing Thermo-Mechanical Response of Polymers During Crystallization,” M. Negahban, Ford Motor Company, June 7, 1995.
7. “Using the formal structure of plasticity at finite strains to model the thermomechanical behavior of amorphous polymers around their glass transition,” University of Maryland Baltimore County, May 2, 1997.
8. “Shape memory in polymers: Using the formal structure of plasticity at finite strains to model the thermomechanical behavior of amorphous polymers around their glass transition,” University of Iowa, October 30th, 2003.
9. “Shape memory in polymers: Using the formal structure of plasticity at finite strains to model the thermomechanical behavior of amorphous polymers around their glass transition,” M. Negahban, University of Rouen, France, February 6, 2004.
10. “Thermomechanical Characterization of Crystallization in Solid Polymers,” M. Negahban, Georgia Tech, Atlanta, December 5, 2005.
11. “Experimental characterization and constitutive modeling of polycarbonate under large strains and rapid loads,” M. Negahban, Peking University, Beijing, China, May 22, 2008.
12. “Experimental characterization and constitutive modeling of polycarbonate under large strains and rapid loads,” M. Negahban, Xi’an Jiaotong University, Xi’an, China, May 25, 2008.
13. “Direct development of linear and nonlinear finite elements of shells,” M. Negahban, Zhejiang University, Hangzhou, China, May 30, 2008.
14. “Experimental characterization and constitutive modeling of polycarbonate under large strains and rapid loads,” M. Negahban, University of Science and Technology, Beijing, China, June 2, 2008.
15. “Experimental characterization and constitutive modeling of polycarbonate under large strains and rapid loads,” M. Negahban, Beijing Jiaotong University, Beijing, China, June 4, 2008.
16. “Experimental characterization and constitutive modeling of polycarbonate under large strains and rapid loads,” M. Negahban, Georgia Tech, Atlanta, March 3, 2009.
17. “A life with endless starts riding upon your changing dreams,” M. Negahban, **Graduate Commencement Speaker**, University of Nebraska-Lincoln, Lincoln, Nebraska, August 14, 2009.
18. “Partnership with AMME: A Journey Through the Mechanics and Thermodynamics of Solids,” M. Negahban, Honorary Doctorate (**docteur Honoris Causa**), University of Rouen, France, April 22, 2016.
19. “Lectures on the applications of continuum mechanics: Continuum thermodynamics of solids, the theory of shells, optimal atom to continuum transformations,” Peking University, Beijing, China, December 2018.

TEACHING EXPERIENCE

University of Michigan: Teaching Assistant for Strength of Materials (Mechanical Engineering) and Intermediate Strength of Materials (Aerospace Engineering), and Instructor for Dynamics (Mechanical Engineering).

University of Nebraska: Courses taught are Statics, Dynamics, Strength of Materials, Advanced Dynamics, Numerical Methods, Introduction to the Finite Element Method, Fundamentals of Finite Element Analysis, Continuum Mechanics, Nonlinear Continuum Mechanics, Viscoelasticity, Theory of Plasticity, Large Deformation Plasticity.

Peking University: Nonlinear Finite Element Methods, Viscoelasticity.

ON-LINE NOTES AND APPLICATIONS

Mathematics for Mechanics: Notes developed to introduce students to the mathematics needed for mechanics and for preparation in taking the Mechanics Readiness Test.
(<http://emweb.unl.edu/Math/mathweb/mathtoc.html>)

Engineering Statics: Class notes for statics.
(<http://emweb.unl.edu/NEGAHBAN/EM223/Intro.htm>)

Mechanics of Materials: Class notes for strength of materials .
(<http://emweb.unl.edu/NEGAHBAN/Em325/intro.html>)

Engineering Dynamics: Class notes for engineering dynamics.
(<http://emweb.unl.edu/NEGAHBAN/EM373/Intro.htm>)

C# Programming: A set of notes to learn the C# programming language focused for more engineering applications.
(<http://emweb.unl.edu/negahban/CSharp-VisualStudioTutorial/CSharp-VisualStudio-Overview.htm>)

EducationSystem: An application to deliver web-based notes and computer generated exams and homework on the internet.
(<http://emweb.unl.edu/>)

GRADUATE STUDENTS

- Jefferey D. Nielson, “Determining Elongated Extrudate Profiles Through Mathematical Modeling,” MS, Engineering Mechanics, University of Nebraska-Lincoln, August, 1991.
- Daniel J. Wolterman, “Delamination Strength of Filament Wound Curved Composite Members Subjected to Bending,” MS, Engineering Mechanics, University of Nebraska-Lincoln, May, 1992.
- Ruojuan Ma, “The Study of the Influence of Uniform Crystallization on the Mechanical Response of Polymers and Polymer-Matrix Composites,” PhD, Engineering Mechanics, University of Nebraska-Lincoln, August, 1994.
- Juliette Dauphin (with Jean-Marc Saiter), Master M2, Materials Engineering (CEMPI), “The characterization of the thermal and mechanical effects of isothermal and non-isothermal crystallization of PET by DSC and DMTA studies,” University of Rouen, Rouen, France, September, 2001.
- Philippe Dos Santos Claro (with Jean-Marc Saiter), Master M2, Materials Engineering (CEMPI), “The characterization of the transient thermal kinetics of crystallization of PET by DSC,” University of Rouen, Rouen, France, September, 2003.
- Pierre Delabarre (with Jean-Marc Saiter), Master M2, Materials Engineering (CEMPI), “The characterization of polycarbonate by DMA and other mechanical testing,” University of Rouen, Rouen, France, September, 2004.
- Pierre Delabarre, Joint PhD with the University of Nebraska-Lincoln, USA, and the University of Rouen, France (2005-2006, did not complete program).
- Elodie Letray (with Joe Turner and Jean-Marc Saiter), Master M2, Materials Engineering (CEMPI), University of Rouen, Rouen, France, September, 2006.
- Meriem Ben Salah, “Experimental Material Characterization and Computational Modeling of Indentation with the Specific Application of Nano-Indentation in Polydimethylsiloxan(PDMS)” (with Joe Turner), Master, Civil Engineering and Geodetic Sciences, Leibniz University of Hanover, Hanover, Germany, May 2008 (Self funded).
- Kyle Wayne Strabala, “The Effects of Combined Compression and Aging on the Properties of Glassy Polycarbonate,” MS, Engineering Mechanics, University of Nebraska-Lincoln, August, 2009, **AND** MS, Materials Engineering, University of Rouen, Rouen, France, August, 2009 (ARL, FIPSE-ATLANTIS, French-American Cultural Exchange Partner University Fund funded).
- Céline Hayot, “Viscoelastic properties of the cell walls of Arabidopsis thaliana using nanoindentation,” MS, Engineering Mechanics, University of Nebraska-Lincoln, August, 2009, **AND** MS, Materials Engineering, University of Rouen, Rouen, France, August, 2009 (European Union-ATLANTIS, French-American Cultural Exchange Partner University Fund funded).
- Ashwani Goel, “Title Thermodynamically consistent large deformation constitutive model for glassy polymers,” PhD, Engineering Mechanics, University of Nebraska-Lincoln, December, 2009 (ARL, ARO, NDoR funded).

- Shawn Meagher, “Anomalous loss of toughness of work toughened polycarbonate,” double MS, Engineering Mechanics, University of Nebraska-Lincoln, December, 2010, **AND** MS, Materials Engineering, University of Rouen, Rouen, France, December, 2010 (ARO, FIPSE-ATLANTIS, French-American Cultural Exchange Partner University Fund funded).
- Jonathan Hein, “Ultrasonic and stereo-optical characterization techniques for applications in mechanical testing,” MS, Engineering Mechanics, University of Nebraska-Lincoln, May, 2011 (ARO funded).
- Charles Landais (with Joe Turner), “Ultrasonic Methods for the Characterization of Complex Materials and Material Systems: Polymers, Structured Polymers, Soft Tissue and Bone,” double MS, Engineering Mechanics, University of Nebraska-Lincoln, Materials Engineering, University of Rouen, Rouen, France, May 2011 (European Union-ATLANTIS, French-American Cultural Exchange Partner University Fund funded).
- Quentin Fichot (with David Allen), “Characterization, modeling, and consequences of the development during plastic flow of large anisotropy in the wave-speeds,” double MS, Engineering Mechanics, University of Nebraska-Lincoln, Materials Engineering, University of Rouen, Rouen, France, August 2010 (European Union-ATLANTIS, French-American Cultural Exchange Partner University Fund funded).
- Lili Zhang, PhD, Engineering Mechanics, “Propagation of thermo-mechanical waves in deforming non-linear viscoelastic bodies,” University of Nebraska-Lincoln, May 2013 (ARL, ARO funded).
- Thomas Boulet (with Shadi Othman), PhD, Engineering Mechanics, University of Nebraska-Lincoln, expected December 2012 (ARO funded).
- Yenan Wang, PhD, Engineering Mechanics, University of Nebraska-Lincoln, expected May 2013 (CRC-China funded).
- Ke Yu, “Generic Strategies to Implement Material Grading in Finite Element Methods for Isotropic and Anisotropic Materials,” MS, Engineering Mechanics, University of Nebraska-Lincoln, December, 2011 (NaBRO funded).
- Derek Peterson, double MS, Engineering Mechanics, University of Nebraska-Lincoln, Materials Engineering, University of Rouen, Rouen, France, expected December 2012 (Funded by US-ATLANTIS, French-American Cultural Exchange Partner University Fund, Army Research Laboratory).
- Lena Butterfield, double MS, Engineering Mechanics, University of Nebraska-Lincoln, Materials Engineering, University of Rouen, Rouen, France, expected August 2013 (Funded by US-ATLANTIS, French-American Cultural Exchange Partner University Fund, Department of Defense).
- Wenlong Li, PhD, Mechanical Engineering and Applied Mechanics, “Thermo-mechanical characterization of polyether-ether-ketone (PEEK) and polycarbonate (PC) and thermodynamic continuum modeling of glassy polymers”, University of Nebraska-Lincoln (2013-2018; Funded by Army Research Laboratory, Midwest Roadside Safety Facility).
- Ramy Farrag, PhD, Engineering Mechanics, University of Nebraska-Lincoln (funded by Army Research Laboratory; Not Completed).
- Evan Schwahn, M.S., Mechanical Engineering and Applied Mechanics, Using Controlled Curing in a Custom Stereolithography-based 3D Printing Machine to Obtain Graded Property Variations (2015).
- Zhong Chen, PhD, Materials Engineering, Optimization of material grading (2012-2016).
- Zesheng Zhang, PhD, Mechanical Engineering and Applied Mechanics, “Multiscale investigation of mechanical response and identification of molecular sources of ratcheting in polycarbonate,” University of Nebraska-Lincoln (2013-2019; Funded by Army Research Laboratory, Midwest Roadside Safety Facility).
- Marzieh Bakhtiary Noodeh, PhD, Materials Engineering, Material grading in 3D printing (2014-Not Completed),

UNDERGRADUATE STUDENTS

- Rob Gray, Construction of a testing machine and thermal chamber for large extension (1989-1991).
- Mark Fleming, Characterization of PMMA in shear (1991-1992).
- Farrell Calcaterra, Modeling shape memory in amorphous polymers (1991-1993).
- Jeff Lundy, Computational characterization of shape recover (1993-1994).
- Todd Leathers, Computational characterization of shape recovery (1994-1995).
- Steve Carroll, Shear response in glassy and rubbery PMMA (1996-1997).
- Nick Hiser, Analysis of PMMA results around its glass transition (1996).
- Russell Froehlich, Mechanics Readiness Program (1996-1998).

- Nicole Denise Buffington, REU student, Characterization of crystallization in PE (1999).

PROFESSIONAL ACTIVITIES

1. Conference Organization:

- Organizing Chair, POLYCHAR 23, 23rd World Forum on Advanced Materials, Lincoln, Nebraska, May 11-15, 2015.

2. Conference Symposium Organization:

- Co-organizer with Alan S. Wineman of "Symposium on nonlinear mechanics of polymers," 23rd Midwestern Mechanics Conference, Lincoln, Nebraska, October 10-13, 1993.
- Organizer of a symposium on Current Research in the Thermo-Mechanics of Polymers in the Rubbery-Glassy Range for the Joint Applied Mechanics and Materials Summer Meeting of the American Society of Mechanical Engineers, Los Angeles, California, June 28-30, 1995.
- Organized a symposium on the Thermo-Mechanics of Solid Polymers for the 1996 Mechanics & Materials Conference of the American Society of Mechanical Engineers, The Johns Hopkins University, Baltimore, MD, June 12-14, 1996.
- Co-Organized with Said Ahzi a symposium titled Mechanics and Materials Issues for Polymers to be held during 35th Annual Technical Meeting of the Society of Engineering Science, Pullman, Washington, September 27-30, 1998.
- Co-Organizer with J.-M. Saiter of a symposium on polymers at the 2004 SES meeting, Lincoln, Nebraska.
- Co-Organizer with G. McKenna of a symposium in honor of Alan Winemans at the 2004 SES meeting, Lincoln, Nebraska.
- Co-Organizer with A. Segall Thermoelasticity and Thermal Shock at the 2004 SES meeting, Lincoln, Nebraska.
- Co-Organizer with Zheng Li and Jean Grenet of a symposium on mechanical effect in polymers at PolyChar 17, Rouen, France, April 20-24, 2009.
- Co-Organizer with Jim Caruthers of the symposium on Modeling and Thermodynamics of Nonlinear Viscoelastic and Viscoplastic Materials, 7th International Conference on Mechanics of Time-Dependent Materials, Portoroz, Slovenia, September 5-11, 2010.

3. Scientific Committee Membership:

- Member of the International Scientific Advisory Committee for the International Workshop on New Approaches to Hi-Tech Materials 97, Nondestructive Testing and Computer Simulations in Materials Science and Engineering, 9-12 June 1997, St. Petersburg, Russia.

- Member of the International Scientific Committee for the 35th Annual Technical Meeting of the Society of Engineering Science, Pullman, Washington, September 27-30, 1998.
 - Member of Scientific Committee of PolyChar World Forum on Advanced Materials (2007-).
 - Member of Scientific Committee of International Conference on Polymer Behavior (2007-).
4. Editor and Editorial Board Membership:
- Editor of an Applied Mechanics Division of ASME volume containing the full length papers of the presentations in the symposium on Current Research in the Thermo-Mechanics of Polymers in the Rubbery-Glassy Range to be held as part of the Joint Applied Mechanics and Materials Summer Meeting of the ASME, Los Angeles, California, June 28-30, 1995.
 - Member of Editorial Board of The Mechanics of Time-Dependent Materials Journal (2008-).
5. US-Director of the Advanced Mechanics and Materials Engineering international laboratory (AMME-International) between University of Nebraska-Lincoln and University of Rouen in France (2010-).
6. Present or previous member of: American Academy of Mechanics; American Society of Mechanical Engineers; Elasticity Committee of the Applied Mechanics Division of ASME; Society of Engineering Science; Society for Natural Philosophy; Society of Plastics Engineers; Society of Rheology;
7. **Reviewer for:**
- Advances in Mechanical Engineering;
 - Acta Mechanica Solida Sinica;
 - Applied Mechanics Reviews;
 - ASME Journal of Applied Mechanics;
 - ASME Journal of Biomechanical Engineering;
 - ASME Journal of Engineering Materials and Technology;
 - ASME Pressure Vessels and Piping Division Conference;
 - Composites and Structures;
 - Geomechanics and Engineering;
 - International Conferences on Polymer Characterization;
 - International Journal of Fracture;
 - International Journal of Impact Engineering;
 - International Journal of Nonlinear Mechanics;
 - International Journal of Solids and Structures;
 - International Journal of Plasticity;
 - IRWIN publishing;
 - Journal of Biomechanics and Modeling in Mechanobiology;
 - Journal of Continuum Mechanics and Thermodynamics;
 - Journal of Dynamic Behavior of Materials;
 - Journal of Elasticity;
 - Journal of Experimental Mechanics;
 - Journal of Molecular Graphics and Modeling;
 - Journal of Optics and Lasers in Engineering;
 - Journal of Polymer Engineering and Science;
 - Journal of Polymer Research;
 - Journal of Polymer Science Part B: Polymer Physics;
 - Journal of Sound and Vibration;
 - Journal of the Mathematics and Mechanics of Solids;
 - Journal of the Mechanics of Time-Dependent Materials;
 - Journal of Vibration and Acoustics;
 - Langmuir Journal;
 - Macromolecule;
 - Mathematics and Mechanics of Solids;
 - Materials;
 - Mechanics of Materials Journal;
 - Modelling and Simulation in Materials Science and Engineering;
 - National Science Foundation;
 - Nondestructive Testing and Evaluation;
 - Optics and Lasers in Engineering;
 - Polymer Testing Journal;
 - Thermochemica Acta Journal.

AWARDS AND HONORS

- UNL Parents Association and Teaching Council Recognition Award, UNL, January 1990.
- UNL Parents Association and Teaching Council Recognition Award, UNL, January 1992.
- Department of Engineering Mechanics Teaching Award, UNL, 1998.
- Department of Engineering Mechanics Teaching Award, UNL, 1999.
- UNL Parents Association and Teaching Council Recognition Award, January 2000.
- Department of Engineering Mechanics Teaching Award, UNL, 2001.
- Holling Family Distinguished Senior Faculty Teaching Award, College of Engineering and Technology, UNL, April 2003.
- Holling Family Distinguished Senior Faculty Teaching Award, College of Engineering and Technology, UNL, April 2009.
- UNL Parents Association and Teaching Council Recognition Award, UNL, January 2010.
- UNL Parents Association and Teaching Council Recognition Award, UNL, January 2012.
- Holling Family Master Teacher Award/University-Wide Teaching Award, College of Engineering, UNL, April 2014.
- UNL College Distinguished Teaching Awards, UNL, April 2014.
- Holling Family Distinguished Teaching/Advising/Mentoring Award, College of Engineering, UNL, April 2015.
- Honorary Doctorate (docteur Honoris Causa), University of Rouen, France, April 2016.
- UNL Parents Association and Teaching Council Recognition Award, UNL, January 2017.
- Pierre-Gilles de Gennes Award, in recognition of outstanding contribution in macromolecular science and polymer characterization, Poly-Char 2019, Katmandu, Nepal.

FUNDING

- M. Negahban, “Experimental Evaluation of the Nonlinear Mechanical Response of Polymers,” (UNL Center for Materials Research and Analysis: \$3,000, 10/1/1990 - 6/30/1991).
- M. Negahban, Thermo-Mechanical Testing of Polymers, (UNL Research Council Grant-In-Aid: \$2,500, 5/1/1990 - 4/30/1991).
- M. Negahban, Investigation of Mechanical Response During Phase Transition in Polymers, (Engineering Foundation (for AFOSR) Engineering Research Initiation Grants: \$20,000, 9/1/1990 - 8/31/1991).
- M. Negahban (PI), R. Alberts (Co-PI), M. Wu (Co-PI), W. Martin (Co-PI), “Engineering Research Equipment Grant: Workstation Laboratory,” (NSF: \$87,649, College of Engineering: \$22,000, UNL Research Council: \$22,000, 9/1/1991 - 2/28/1993)
- M. Negahban, “Preliminary Experiments to Characterize Shape Recovery in Plastically Formed Polymers,” (UNL Center for Nontraditional Manufacturing: \$800 8/20/1992 - 12/30/1992)
- M. Negahban (PI) “REU Supplement to Engineering Research Equipment Grant: Workstation Laboratory,” (NSF: \$10,000 9/1/1991 - 2/28/1994)
- M. Negahban, “Thermo-Mechanical Effects of Crystallization in Polymers,” (UNL Research Council Grant-in-Aid: \$2,500, 1/1/1993 - 12/31/1993)
- M. Negahban, “Preliminary Experiments to Characterize Shape Recovery in Plastically Formed Polymers,” (UNL Center for Nontraditional Manufacturing: \$780 12/10/1993 - 5/1/1994)
- M. Negahban, “Analysis of PMMA results around its glass transition,” Center for Materials Research and Analysis, UNL, \$1,000 (1996).
- Dzenis (PI/PD), Murphy, Negahban, Rhode, Tong, “Engineering Research Equipment: Equipment for High Temperature Durability Studies of Advanced Materials” (NSF-Equipment: \$60,000, 7/15/96-6/30/97)
- Dzenis (PI/PD), Negahban, Rohde, Timm, “Acquisition of System for Advanced Thermo-Mechanical Studies of Polymers, Composites, and Coatings” (NSF-Equipment: \$75,000, 7/1/96-6/30/97)
- Dzenis (PI/PD), Mark Beatty, Dillon, Ianno, Murphy, Negahban, Rohde, Stezowski, Timm, Weins, Williams, “Acquisition of Scanning Acoustic Microscope” (NSF-Equipment: \$235,000, 10/1/96-9/30/97)
- M. Negahban (PI), J. Turner, J. Yang., “Development of Statics Readiness Program,” (UNL Teaching Council: \$6,000 , College of Engineering and Technology: \$3,800 CET, Deptment of Engineering Mechanics: \$3,800, 1999-2001)

- M. Negahban (PI-50%) and R. Feng (Co-PI-50%) “Characterization of the dynamic thermomechanical response of Polycarbonate,” (U.S. Army Research Laboratory (ARL) under the RMAC-RTP Cooperative Agreement No. W911NF-04-2-0011. (David Allen PI): \$300,191, 6/25/2004 - 5/10/2008)
- A. Azizinamini (PI-75%), M. Negahban (Co-PI-25%), “Development of Field Data for Effective Implementation of the Mechanistic Empirical Pavement Design Procedure” (Nebraska Department of Roads: \$315,252, 07/01/2006 - 06/30/2010)
- M. Negahban (US-PI-50%), J.-M. Saiter (French PI-50%), “Simultaneous Double Master Program in Mechanics and Materials” (French-American Cultural Exchange Partner University Fund (FACE-PUF): \$125,000, 07/03/2007 - 07/02/2010)
- M. Negahban (PI), A. Azizinamini, Y. Dzenis, R. Feng, L. Tan, “System for full-field 3D displacement, velocity and strain measurement: ARAMIS 3D HR” (College of Engineering Research Infrastructure Enhancement: \$75,000, Department of Engineering Mechanics \$12,950, 2007)
- D. Allen (PI-15%US), M. Negahban (PD-60%US), Namas Chandra (Co-PI-25%US), J.-M. Saiter (French PI-50%EU), J. Varna (Swedish PI-50%EU) “EMME: US-EU Transatlantic Degree Program in Engineering Mechanics and Materials Engineering” (DoEducation-FIPSE:\$407,999, European Union: 407,999 Euro, 09/01/2007 - 08/31/2011)
- M. Negahban (PI), J. Turner (Co-PI), “Material Characterization and Modeling of Head and Helmet Materials” (Army-UNL Center for Trauma Mechanics, Army Research Office contract number W911NF-08-1-0483 (N. Chandra PI); Negahban: \$143,325 (+\$50,000 equipment), 10/1/2008 - 9/30/2010); Army-UNL Center for Trauma Mechanics, Army Research Office contract number W911NF-08-1-0483 (N. Chandra PI); Negahban: \$50,730 (+\$198,000 equipment), 10/1/2008 - 9/30/2010)
- M. Negahban (PI), “Skin and dura characterization” (Army-UNL Center for Trauma Mechanics, ARO contract number is: W911NF-11-1-0033 (N. Chandra PI); Negahban: \$101,761, 11/22/2010-11/21/2012);
- M. Negahban (PI), L. Tan (Co-PI), “Polymer Parts with Tailored Microstructure Distributions Optimized for an Application,” contract number: HQ0147-12-C-6013, \$837,504, 11/21/2011-5/20/2015.
- M. Negahban (PI), “Development of a dynamic internal state variable constitutive and failure model for glassy polymers,” Battelle Scientific Services Program, DOD-Army Research Office, contract number: TCN-11109, \$134,912, 10/12/2011-03/31/2013.
- F. Bobaru (PI), M. Negahban (Co-PI), “Validation of Peridynamic Models of Glassy Polymer Networks,” High Performance Technologies Inc., DoD-Army Research Laboratory, award number HPTi-PETTT-NEBRASKA, \$173,135, 10/06/2011-08/31/2012.
- M. Negahban (Sub-Award PI), “Integration of MultiMech with ABAQUS,” MultiMech R & D LLC, sub-award from Nebraska Department of Economic Development, \$50,290, 8/1/14-7/31/15.
- M. Negahban (Lead PI), “Conference and Workshop Proposal: Student and Young Investigator Grants for PolyChar 23 at the University of Nebraska-Lincoln,” National Science Foundation, \$15,000, 02/15/2015-01/31/2016.
- J. Subbiah (PI), M. Negahban, D. Jones, A. Guru, “Title: Water Physics Model for a Heterogeneous Meal System in a Rotating Pattern Tray with a Lid Stock Seal.” ConAgra, \$59,971, 01/01/2015-12/31/2015.
- Z. Li (PI), X. Su (Co-I), M. Negahban (Co-I), “The study and design of sensors based on piezoelectric metamaterials,” National Natural Science Foundation of China, 1,020,000 RMB, 01/01/2017-12/31/2020.
